## **HTP Quick Spot II** #60501

Now, with the HTP Quick Spot II, anyone can make factory looking spot welds quickly, easily, and affordably. This 220-volt powerhouse produces 6000 amps, making rust repairs and panel repairs a snap. The Quick Spot II welds with virtually no warpage, and finishing work is minimized because no metal is added in the welding process. You don't have to worry about pitting windshields or burning up interiors because the Quick Spot II eliminates spatter.

Best of all, the Quick Spot II requires absolutely no welding skill to operate. The same Micro-processor technology found in our Versa Spot 7000 means you just select the thickness of the panels you're welding, squeeze the handles together, and the Quick Spot II does the rest. It even has a pulse feature for burning through primers!

The Quick Spot II also uses the same spot welding arms as the Versa Spot 7000, so you will be sure you can tackle just about any welding job that comes your way. We recommend the Quick Spot II for the sophisticated home shop, body man, sheet metal fabrication shop and antique restorer.

## **Quick Spot II Specs**

| Maximum Welding Current        | 6000 amps                     |
|--------------------------------|-------------------------------|
| Welding Voltage                | 2.5 volts                     |
| Max. Electrode Pressure        | 265 lbs                       |
| Input Voltage                  | 220 volts                     |
| Input Amperage                 | 30 amps                       |
| Maximum Absorbed Power         | 13 Kw                         |
| Rated Power                    | 2.3 Kw @ 50%                  |
| Spots/Hr                       | 180                           |
| (continuous mode 20 ga panels) |                               |
| Maximum Double Sided           |                               |
| Spot Welding Thickness         | 14 ga (.075") + 14 ga (.075") |
| Dimensions                     | 17" L x 4"W x 7" H            |

## **HTP Tip Dresser**

Keeping your spot welding electrodes in top shape is critical to making a good weld. Well, leave it to HTP to come up with a quick, easy solution. Our unique Tip Dresser makes it a snap for you to expertly sharpen your spot welding electrodes so they are always in peak operating condition. All you do is chuck the tip dresser in a drill and sharpen! It's that simple to ensure perfectly finished electrodes every time you weld. The HTP Tip Dresser is available to fit 12mm electrodes which work with the Versa Spot 7000 or Quick Spot II.
